

REMARKS

By this Amendment, Claims 11, 13, 17 and 18 have been canceled and Claim 19 has been amended so as now to depend from allowed Independent Claim 15 to place Claims 19 and 20 into allowable form. Since the foregoing amendments cancel Claims or address matters of form, entry of the foregoing amendments and reconsideration of the Application, as amended, are respectfully requested.

Attached hereto is a mark-up version showing the changes made to the Claims by the current Amendment which is entitled "Version with markings to show changes made."

Applicants note with appreciation that Examiner's indication that Claims 4, 5, 7, 8, 15 and 16 are allowed. In light of Applicants' amendment to dependent Claim 19 so as to now depend from allowed Independent Claim 15, Applicant respectfully submits that Claim 19 and Claim 20, which now dependent directly or indirectly from allowed Claim 15, are also allowable and early notice of the same is respectfully requested.

Applicants respectfully submit that the various rejections of Claims 11, 13, and 17-20 have been rendered moot by the cancellation of those Claims and the amendment to Claim 19 so that Claims 19-20 now depend from allowed Claim 15. In view of the foregoing amendments and remarks, Applicant respectfully submit that the Application is now in a condition for allowance and early notice of the same is earnestly solicited. However, in order to expedite the prosecution of the application for all concerned, the Examiner is invited to contact the undersigned should any questions arise.

Respectfully submitted,

Eric R. Katz

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

Please cancel Claims 11, 13, 17, and 18 and amend Claim 19 as follows:

1. (Previously Canceled) An activity wipe dispenser for dispensing wipes, the dispenser comprising:
 - a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;
 - a lid for closing the open top of the container; and
 - a disposal chamber for receiving used wipes.
2. (Previously Canceled) An activity wipe dispenser according to Claim 1, further comprising attachment means for attaching the container to disparate articles.
3. (Previously Canceled) An activity wipe dispenser according to Claim 1, wherein the container comprises a hollow cylinder.
4. (Previously Amended) An activity wipe dispenser according to Claim [3] 7, wherein the cylinder is semi-rigid and manufactured from plastic materials
5. (Original) An activity wipe dispenser according to Claim 4, wherein the plastic materials include at least one of polyethylene and polypropylene.
6. (Previously Canceled) An activity wipe dispenser according to Claim 1, wherein the wipes comprise a continuous roll of sheet material having perforations which separate individual wipes.
7. (Previously Amended) An activity wipe dispenser [according to Claim 1,] for dispensing wipes, the dispenser comprising:
 - a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;
 - a lid for closing the open top of the container; and
 - a disposal chamber for receiving used wipes

wherein the wipes comprise a continuous roll of sheet material having perforations which separate individual wipes; and

wherein the container is a hollow cylinder and the disposal chamber comprises a hollow cylinder hinged to the closed bottom of the container and having latching means for latching an unhinged side of the cylinder at the closed bottom of the container.

8. (Original) An activity wipe dispenser according to Claim 7, wherein the hollow cylinder of the disposal chamber has flexible and resilient, spaced ribs that span a width of the cylinder, the flexible and resilient ribs deflecting to receive and hold used wipes in the disposal chamber.

9. (Previously Canceled) An activity wipe dispenser according to Claim 1, wherein the disposal chamber comprises a bag attached to the container.

10. (Previously Canceled) An activity wipe dispenser according to Claim 1, wherein the container is a cylinder and the disposal chamber is formed by a complementary telescoping hollow cylinder which slides over the sides of the container at the closed bottom of the container to form an expandable disposal chamber space, the telescoping cylinder having a disposal port through which used wipes are placed into the disposal chamber space.

11. (Currently Canceled) A multi-pack arrangement of activity wipe dispensers comprising:

a plurality of activity wipe dispensers, each activity wipe dispenser comprises:

a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;

a lid for closing the open top of the container; and

attachment means for attaching the container to disparate articles; and

a packaging retainer for holding the plurality of activity wipe dispensers together;

wherein the wipes comprise a continuous roll of sheet material having perforations which separate individual wipe; and

wherein each activity wipe dispenser contains wipes with a different and complementary active component particularly useful in connection with different aspects of a specific activity, each activity wipe dispenser having a disposal chamber for receiving used wipes.

12. (Previously Canceled) A multi-pack arrangement according to Claim 11, wherein each activity wipe dispenser further comprises:

a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;
a lid for closing the open top of the container; and
attachment means for attaching the container to disparate articles.

13. (Currently Canceled) A multi-pack arrangement according to Claim [12] 11, wherein the container comprises a hollow cylinder.

14. (Previously Canceled) A multi-pack arrangement according to Claim 12, wherein the wipes comprise a continuous roll of sheet material having perforations which separate individual wipes.

15. (Previously Amended) A multi-pack arrangement [according to Claim 12,] of activity wipe dispensers:

wherein each activity wipe dispenser contains wipes with a different and complementary active component particularly useful in connection with different aspects of a specific activity, each activity wipe dispenser having a disposal chamber for receiving used wipes;

wherein each activity wipe dispenser further comprises:
a container for containing a plurality of wipes, the container having a closed bottom, sides and an open top;
a lid for closing the open top of the container; and
attachment means for attaching the container to disparate articles; and

wherein the container is a hollow cylinder and the disposal chamber comprises a hollow cylinder hinged to the closed bottom of the container and having latching means for latching an unhinged side of the cylinder at the closed bottom of the container.

16. (Original) A multi-pack arrangement according to Claim 15, wherein the hollow cylinder of the disposal chamber has flexible and resilient, spaced ribs that span a width of the cylinder, the flexible and resilient ribs deflecting to receive and hold used wipes in the disposal chamber.

17. (Currently Canceled) A multi-pack arrangement according to Claim [12] 11, wherein the disposal chamber comprises a bag attached to the container.

18. (Currently Canceled) A multi-pack arrangement according to Claim [12] 11, wherein the container is a cylinder and the disposal chamber is formed by a complementary telescoping hollow cylinder which slides over the sides of the container at the closed bottom of the container to form an expandable disposal chamber space, the telescoping cylinder having a disposal port through which used wipes are placed into the disposal chamber space.

19. (Currently Amended) A multi-pack arrangement according to Claim 15[11], wherein the specific activity comprises one of: boating, camping, sporting events, hunting, tennis, golf, auto care, home care, backpacking, cycling, skiing, child care, patient care, custodial work activities and fishing.
